ABOUT US

JNS Mining-Logistic-Commodities-Agri is a South African company established in 2020 with a focus on the mining, logistics, commodities, and agriculture industries.

At JNS, we are committed to providing our clients with the highest quality services and products. We have a team of experienced professionals who are knowledgeable about their respective industries and are dedicated to ensuring that our clients' needs are met.

Our mining operations are conducted with the utmost care for the environment, and we adhere to all relevant safety and T regulatory standards.

In the logistics field, we specialize in the transportation of goods both locally and internationally. In the commodities industry, we trade in a range of products, including precious metals, agricultural products, and energy commodities. Our team of experts keeps up-to-date with the latest market trends to ensure that we can provide our clients with the best possible service and advice.

Lastly, in the agriculture sector, we focus on the production and distribution of high-quality agricultural products. We work closely with farmers to ensure that we can provide our customers with a wide range of fresh, healthy, and sustainable products.

At JNS, we are committed to excellence, and we strive to exceed our client's expectations. Ourcompany values include integrity, accountability, and teamwork, and we pride ourselves on providing outstanding customer service.

VISION

Our vision at JNS Mining-Logistic-Commodities-Agri is to become a leading provider of quality services and products in the mining, logistics, commodities, and agriculture industries. We aim to achieve this by consistently exceeding our clients' expectations, maintaining the highest standards of safety, environmental responsibility, and regulatory compliance, and leveraging the latest technology and innovation to improve our operations. We are committed to building strong, long-lasting relationships with our clients, partners, and employees, and to contributing to the sustainable development of the communities in which we operate.

MISSION

Our mission at JNS Mining-Logistic-Commodities-Agri is to deliver exceptional value to our clients in the mining, logistics, commodities, and agriculture industries by providing them with high-quality services and products.

JNS MINING SERVICES

JNS Mining-Logistic-Commodities-Agri provides a comprehensive range of mining service to our clients in the mining industry. These services include:

>>> CONSULTING:

Our team of mining experts provides consulting services to clients looking to optimize their mining operations. We can help with mine planning, mineral resource assessments, and feasibility studies.

MINE PLANNING:

We offer mine planning services to help our clients optimize their mining operations, reduce costs, and maximize profitability.

>>> HIRING OF EQUIPMENT:

We provide a range of mining equipment for hire, including excavators, trucks, and loaders.

>>> CONTRACT MINING:

We offer contract mining services to clients looking to outsource their mining operations. Our experienced team can manage the entire mining process, from exploration to production.

>>> PROJECT MANAGEMENT:

We provide project management services to ensure that mining projects are completed on time and within budget. Our team has the expertise to manage complex mining projects and ensure that all stakeholders are kept informed throughout the process.

>>> TRADING OF MINERALS:

We trade in a range of minerals, including precious metals, base metals, and industrial minerals.

>>> CROSS-BORDER TRANSPORTATION:

We provide cross-border transportation services for mining products, ensuring that they are delivered safely and on time.

>>> EXPORT:

We facilitate the export of mining products to international markets, providing our clients with access to a global customer base.

- 8 -

JNS AGRI SERVICES

JNS Agri Services offers a range of products and services to support the agricultural industry. These services include:

>>> SEEDS:

We offer a wide range of high-quality seeds for various crops. Our seeds are carefully selected and tested to ensure maximum yield and quality.

>>> FERTILIZERS:

We provide a variety of fertilizers to meet the specific needs of different crops. Our fertilizers are designed to improve soil fertility, increase crop yields, and enhance the overall quality of agricultural products.

>>> AGRO PROCESSED PRODUCTS:

We process and package a variety of agricultural products, including flours, grains, pulses, spices, and oils. Our agro-processed products are of the highest quality and are carefully packaged to ensure freshness and flavor.

JNS POLYMER SERVICES

JNS Polymer Services provides a range of services related to industrial rubber and plastic extrusions and moulding. Our services include:

MANUFACTURING:

We manufacture industrial rubber and plastic extrusions and moulding products to meet the specific needs of our clients. Our products are made using highquality materials and the latest manufacturing techniques to ensure optimal performance and durability.

>>> EXPORTING:

We export our industrial rubber and plastic products to clients around the world. We have extensive experience in international trade and can provide clients with the necessary documentation and support to ensure smooth and efficient exports.

>>> IMPORTING:

We also import industrial rubber and plastic products from international suppliers to meet the needs of our clients. Our team carefully selects suppliers and products to ensure that they meet our high standards of quality and reliability.

>>> CUSTOMIZATION:

We offer customized solutions for our clients specific requirements. Our team works closely with clients to understand their needs and develop customized products that meet their exact specifications.

>> QUALITY CONTROL:

We have a rigorous quality control process in place to ensure that our products meet the highest standards of quality and reliability. Our team carefully inspects each product before it is shipped to ensure that it meets our clients expectations.

> PRODUCTS:

JNS MINING ORES AND COMMODITIES:

- Manganese ore
- Chrome ore and concentrate:
- Anthracite
- Metallurgical coal
- Silicon manganese
- Copper concentrate
- Coke
- Zinc
- Lithium
- Sintered Manganese Ore

JNS POLYMER PRODUCTS:

INS MINING ORES AND COMMODITIES:

EPDM Rubber

EPDM (Ethylene Propylene Diene Monomer) Rubber is a synthetic elastomer with excellent weathering and ozone resistance properties. It has good resistance to chemicals and is used in various applications such as automotive seals, weatherstripping, roofing, and wire insulation. Some of the specifications of EPDM

Rubber include:

Tensile Strength: 800-1200 psi

Elongation: 300-600% Hardness: 40-90 Shore A

Temperature Range: -50°C to +120°C

SBR

SBR (Styrene Butadiene Rubber) is a synthetic elastomer that is similar to natural rubber. It has good abrasion resistance, high resilience, and is used in various applications such as tires, footwear, and conveyor belts. Some of the specifications of SBR include:

Tensile Strength: 2500-5000 psi

Elongation: 300-500% Hardness: 40-90 Shore A

Temperature Range: -40°C to +100°C

Neoprene

Neoprene is a synthetic elastomer that has good resistance to oils, chemicals, and weathering. It is used in various applications such as wetsuits, electrical insulation, and gaskets. Some of the specifications of Neoprene include:

Tensile Strength: 800-1500 psi

Elongation: 200-400% Hardness: 40-90 Shore A

Temperature Range: -30°C to +120°C

Nitrile (NBR)

Nitrile is a synthetic elastomer that has good resistance to oil, fuel, and chemicals. It is used in various applications such as oil seals, fuel hoses, and gaskets.

Some of the specifications of Nitrile include:

Tensile Strength: 1500-4000 psi

Elongation: 200-500% Hardness: 40-90 Shore A

Temperature Range: -30°C to +120°C

10. PVC: PVC (Polyvinyl Chloride) is a synthetic thermoplastic polymer that is known for its versatility, durability, and low cost. It is used in various applications such as pipes, cables, and flooring. Some of the specifications of PVC include:

Tensile Strength: 4000-8000 psi

Elongation: 10-200% Hardness: 50-90 Shore A

Temperature Range: -10°C to +60°C

TPE-TPR

TPE/TPR (Thermoplastic Elastomer/Thermoplastic Rubber) is a synthetic elastomer that has a combination of plastic and rubber properties. It is used in various applications such as automotive parts, footwear, and medical devices. Some of the specifications of TPE/TPR include:

Tensile Strength: 1000-5000 psi

Elongation: 200-800% Hardness: 40-90 Shore A

Temperature Range: -40°C to +120°C
